

# Airwindows Wrappers Getting Started Guide

Airwindows Wrappers are custom Max For Live user interface wrappers for the AU and VST plugins by [Airwindows](#).

The wrappers themselves do not produce or manipulate sound — they simply provide a custom visual interface for their corresponding plugin. The original plugins are still required to be installed for the wrappers to function.

Any info pertaining to the function of the original plugin should be found on the original plugin's page on the Airwindows website (links provided below).

# Installing Wrappers

## Step 1 — Install Original Plugins

In order for the wrappers to function you will need the original plugins installed, so make sure to do this first. It is recommended to install the AU versions for Mac and the VST versions for PC.

It is also recommended to install the plugins in the default system location for that plugin type.

The plugins included in the Airwindows Wrappers can be downloaded from the following pages:

- ADClip7 — <https://www.airwindows.com/adclip-7/>
- Apicolypse — <https://www.airwindows.com/apicolypse/>
- BiquadPlus — <https://www.airwindows.com/biquadplus/>
- BlockParty — <https://www.airwindows.com/blockparty/>
- BussColors4 — <https://www.airwindows.com/busscolors-4/>
- Capacitor2 — <https://www.airwindows.com/capacitor2/>
- Channel9 — <https://www.airwindows.com/channel9/>
- DeRez2 — <https://www.airwindows.com/derez2/>
- Galactic — <https://www.airwindows.com/galactic/>
- Hard Vacuum — <https://www.airwindows.com/hard-vacuum-vst/>
- IronOxide5 — <https://www.airwindows.com/iron-oxide-5/>
- kPlateA — <https://www.airwindows.com/kplatea/>
- kPlateB — <https://www.airwindows.com/kplateb/>
- kPlateC — <https://www.airwindows.com/kplatec/>
- kPlateD — <https://www.airwindows.com/kplated/>
- MackEQ — <https://www.airwindows.com/mackeq/>

- Mackity — <https://www.airwindows.com/mackity/>
- MatrixVerb — <https://www.airwindows.com/matrixverb/>
- Pressure5 — <https://www.airwindows.com/pressure5/>
- Srsly2 — <https://www.airwindows.com/srsly2/>
- Tape — <https://www.airwindows.com/tape-redux/>
- ToneSlant — <https://www.airwindows.com/toneslant/>
- Tube2 — <https://www.airwindows.com/tube2/>

Once you've installed the plugins, make sure they are showing up in the Plug-Ins Category within Live.

## Step 2 — Max For Live Devices

Once the plugins are installed, all that's left is to load the Max devices.

In the file you downloaded you will find 2 folders; AU and VST. These represent the different plugin formats available to use with the wrappers. The AU versions are recommended for use on Mac and the VST version are required for use on PC.

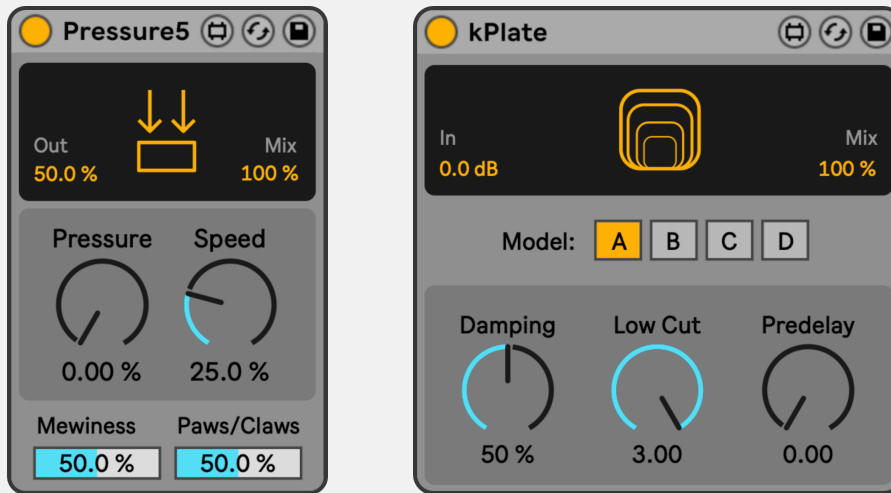

Inside each folder are various .amxd files — these are Max For Live device files. To load them in Ableton Live, simply drag and drop them onto a Track in your project.

Loading a wrapper Max device will automatically load the corresponding plugin in the background. If you've installed the plugins correctly you should hear the wrappers processing the sound when adjusting the controls.

*Note that you will need Max For Live installed to use the Airwindows Wrappers. Max For Live is included with Ableton Live Suite and can be purchased as an add-on for Ableton Live Standard.*

To learn more about installing Packs in Ableton Live, see the [Installing 3rd Party Packs and Content in Ableton Live](#) guide.

# Using Wrappers

Each control in the Max device adjusts the corresponding parameter in the plugin, which is automatically loaded and runs behind the scenes.

You should consult the documentation for the original plugins from the Airwindows website for more detailed info on what each plugin does.

## **Custom Plugin Locations**

It is recommended to install the plugins in the default location for their plugin type, however it is possible to use custom plugin locations if necessary.

See the included “*Custom Plugin Location Guide*” for more info on how to set this up.

## **Additional Info**

As this is a free release I can only offer limited support, however if you have any questions or issues please get in touch at [elphnt.io/contact](https://elphnt.io/contact)

Airwindows Wrappers is made by Ableton Certified Trainer Tom Glendinning, also known as ELPHNT. For more devices, tutorials and free music production resources visit [elphnt.io](https://elphnt.io)

Please read the up-to-date licensing info for Airwindows Wrappers at [elphnt.io/licensing](https://elphnt.io/licensing)

Ableton Live and all its logos are the property of Ableton AG.

Airwindows is the property of Chris Johnson.

## **Support ELPHNT**

If you've enjoyed this or any other content from ELPHNT, please consider supporting so I can keep doing what I do.

You can always find the best way to support at <https://elphnt.io/support-elphnt/>

Thanks,

Tom / ELPHNT
