

# TAPE Getting Started Guide

TAPE is a simple Ableton Live Rack that emulates the sound of analog tape. Use it subtly to add a bit of tape character or go nuts for some full on wonky lofi vibes.

# Installing TAPE

## Installation Options

In the TAPE folder you will find 3 sub-folders with different installation options:

### **Live 9.7**

This is the original version of TAPE (released in 2018). Use this in older versions of Live, from Live 9.7 and above. It will only work in Live Standard or Suite.

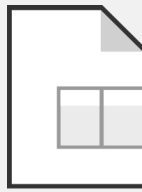

### **Live 11.1 (Intro + Standard)**

This is a Lite version of TAPE that removes certain features (the Noise section) only available in Live Suite. Use this if you have Live Intro or Standard. It will only work in Live versions 11.1 and above.

### **Live 11.1 (Suite)**

This is the full version of TAPE. Use this if you have Live Suite. It will only work in Live versions 11.1 and above.

## How To Install

TAPE.adg

TAPE is an Ableton Live Rack (.adg file), so you can simply drag and drop it into Live from anywhere. You can save the .adg file wherever you keep all of your Ableton Live content, but I'd recommend using the User Library.

If you want to learn more about how to best organise your files in Ableton Live, take a look at my fairly comprehensive video on the subject:

[Get Organised, Improve Your Workflow In Ableton Live](#)

## **Using TAPE**

TAPE is fairly simple to use - just load it onto a Track and play around.

Each control in TAPE is annotated with Info Text. Open Live's Info View (View Menu → Info) then hover over any of TAPE's controls for a brief description of what it does.

## Additional Info

If you have any questions or issues please get in touch at [elphnt.io/contact](https://elphnt.io/contact)

TAPE is made by Ableton Certified Trainer Tom Glendinning, also known as ELPHNT. For more devices, tutorials and free music production resources visit [elphnt.io](https://elphnt.io)

Please read the up-to-date licensing info for TAPE at [elphnt.io/licensing](https://elphnt.io/licensing)
